Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

DETAILED ACTION

Notice of Pre-AIA or AIA Status

1. The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

Allowable Subject Matter

2. **Claims 2-4, 8, 10-17** are allowed.

The following is an examiner's statement of reasons for allowance: The prior arts Furman et al. (US Pub: 2017/0202518 A1) and Oweiss teaches a brain machine interface with algorithm correction capabilities, but do not teach **Claim 8**, "A method of interpreting signals from a brain-machine interface (BMI), the method comprising: receiving a first set of neural signals from a brain of a subject into a BMI decoder; translating, using a first model in the BMI decoder, the first set of neural signals into a first command; detecting, from further neural signals from the subject, a frustration from the subject; **inhibiting the first command by sending a cancelation of the first command, the inhibiting based on the detecting**; routing a second set of neural signals from the brain of the subject to a second model in the BMI decoder based on the detecting; interpreting, using the second model, the second set of neural signals into a second command; and sending the second command."

Specifically, Furman and Oweiss do not teach inhibition command by sending cancelation of the first command after detected frustrations from the user (i.e. Oweiss and Furman uses different algorithm for detection but do not explicitly recited inhibition command which cancels the first command.

The prior arts Furman et al. (US Pub: 2017/0202518 A1) and Oweiss teaches a brain machine interface with algorithm correction capabilities, but do not teach **Claim 14**, "A method of adjusting an implanted or wearable brain-machine interface (BMI) device, the method comprising: receiving neural signals from a brain of a subject into an implanted or wearable BMI device; determining an activity change of the subject based on a sensor; switching from a first compression algorithm to a second compression algorithm based on the determined activity change; compressing, using the second compression algorithm in the BMI device, the neural signals into a data stream; sending the data stream to a BMI controller off-board the subject."

Specifically, Furman and Oweiss do not teach a second compressing algorithm switched from the first one (i.e. Oweiss and Furman uses different algorithm for detection but do not explicitly recited having different compression algorithm in the BMI device).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art Bae (US Patent 10,866,637 B2) is cited to teach in figure 7B embodiment a similar type brain interface system having different gestures classification capacity.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CALVIN C. MA whose telephone number is (571)270-1713. The examiner can normally be reached on 8:00AM-5:00PM.
